PREMIUM SCALE QUALITY **UHMW ROLLER**

With today's production standards, precise weight of material conveyed is critical. The quality of the scale being very important, the importance of the roller is often overlooked. Enduride Canada USA produces the most precise scale quality roller on the market, with unique features engineered to achieve the most precise measurement.

EXTREMELY LOW T.I.R FOR MORE ACCURACY

- T.I.R. up to 0.003"
(Total Indicated Runout / concentricity of the roll)
- UHMW covered roller
- Less material sticking to the roller
- Corrosion resistant *(Stainless steel shaft available)*
- Roller can retrofit any frame in the market
- Scale quality frames available
- Enduride's unique sealing system
- Steel cans also available
